The world of color lighting never stop with Colour Secret.

What is Colour Secret?

Colour Secret is a LED lighting System. LED is a new lighting technology that consumes low power. The lifetime of LED is normally 100,000 hrs. or almost 20 years. It means LED systems consume low power as well as reduces the maintenance cost. Colour Secret System comprises LED light sources and LED controller. Light sources are available in various form such as light stick and flood light. We also can shape our LED system to suit your needs at a reasonable price.

How can we change the color?

Color changing LED comprises Red, Green and Blue LED fit together in the same container. By controlling the brightness of Red, Green and Blue LEDs separately. Colour Secret can give off any colors you like. Colour Secret LED controller gives you a chance to control output display colors, speed of changing, duration, transformation between each scene. With 24 scenes of color changing program, the smart controller makes you become a professional lighting control person in just a few clicks.
